

FINALLY! A Fully Integrated Sketch Application

from the world's leading provider of Fire and EMS software.

► Fast, Easy & Accurate

Take advantage of sketching software 20 years in the making, designed to optimize workflow in the field and at the station. FH Sketch and FH Sketch Mobile are the most user friendly and intuitive sketching applications in the industry.

► Seamless Integration

Benefit from seamless integration within the Occupancy Module and Mobile Inspections, which saves time and eliminates double work.

► Supports Multiple File Formats

With FH Sketch, you can easily import sketches created in another program or obtained from a city planner, assessor or paper file using Photo-metrics. Supported formats include dwg, dxf, png, pdf and jpg.

To see a full list of FH Sketch features, as well as our entire video tutorial series, visit www.firehousesoftware.com/fhsketch

FINALLY! The sketch application you've been asking for is here. Designed for the way you work, both in the field and at the station, FH Sketch and FH Sketch Mobile are now available with the Firehouse Software Occupancy Module and Mobile Inspections. The intuitive interface and seamless integration makes drawing, modifying, updating and exporting pre-plans simpler and easier than ever.

You'll love its rich features and convenience. FH Sketch allows you to reference and utilize aerial photography like never before. It allows you to import files from popular preplan programs in DXF/DWG formats, CAD or hand drawn plans and draw right on top of them. In the field, FH Sketch Mobile utilizes Active Pen technology which allows you to draw on the screen, just like pencil and paper, then import the drawings into FH Sketch for further edits back at the station.
