

# FH Standard and Enterprise

## 7.8.9 Release Notes

A **xerox**  Company

## Introduction

---

These Release Notes are for **FIREHOUSE** Software® release 7.8.9, and provide a listing of the defects resolved during this release. The changes listed in the Release Notes apply to both FH™ Standard and Enterprise editions.

Release Notes for FH 7.8.x releases are available at:

- FH 7.8.7: [http://www.firehousesoftware.com/pdf/FH\\_7\\_8\\_7\\_Release\\_Notes.pdf](http://www.firehousesoftware.com/pdf/FH_7_8_7_Release_Notes.pdf)

## Issues resolved

---

The following issues were successfully resolved this release.

### Some Journal screens are blank when a record opens

**Issue** When using the Journal, the training, investigation, and journal events screens open a blank screen instead of an existing record as expected.

**Resolution** The issue has been resolved.

### EMS issues occur if NEMSIS code set is not installed

**Issue** If the NEMSIS code set is not installed, the following issues occur when using the EMS module.

- When filling in the **EMS/Search & Rescue Report** dialog box, you are unable to fill in the **Number of Patients/Victims At Scene** field.
- When you click **Save** in the **EMS/Search & Rescue Report** dialog box, a message appears stating that a code is required for the **Dispatched For** field, even when a code exists in the field.
- When saving an EMS record, the following message appears:

NEMSIS requires that all EMS units recorded on patient care reports have an assigned EMS response type.

**Resolution** These issues have been resolved.
