KAPLAN FIRE & EMS TRAINING

Reporting made simple

## Kaplan's Learning Management System (LMS)

FIREHOUSE Software®
FH COMPLIANCE MANAGEMENT SYSTEM (T)

CUSTOMIZABLE LMS: TRAINING MANAGEMENT SIMPLIFIED

Kaplan's proprietary, state-of-the-art learning management system (LMS) gives emergency response personnel online access to Fire & EMS training materials anytime, anywhere. This new feature allows departments to have one comprehensive place for items related to training. Combine Kaplan courses with your department's own content, links to useful websites, and other training-related items in one comprehensive resource center. You can upload various types of files:

- Word
- Excel
- PowerPoint
- PDF
- Audio clips
- Images
- Videos in flash or WMV format
- Links

Be sure to categorize the file or link and add a description for easy searching later!

RESOURCE CENTER BENEFITS

- **Efficient:** Unique search tool makes it easy to locate content by topic and keyword.

- **Effective:** Ready access to information and industry best practices—all in one place.

- **Customizable:** Incorporate your department's own PowerPoints, incident videos, new protocols, and other relevant content.

- **Easy to Use:** Simply grab your files on your computer to share with your department/agency.

Reporting made simple

Kaplan's Learning Management System (LMS)

FIREHOUSE Software®
FH COMPLIANCE MANAGEMENT SYSTEM (FHCMS)

A JOINT SOLUTION THAT SAVES TIME FOR YOUR DEPARTMENT!

Kaplan's partnership with **FIREHOUSE Software®**—part of ACS, a Xerox Company—gives you access to one of the best online fire records management systems in the industry, backed by world-class support. FIREHOUSE Software (FH®) is designed to make data entry and records management as easy as possible for fire departments and EMS agencies of all sizes.

Our joint solution, FHCMS (Compliance Management System), will allow the details of the training completed within the Kaplan LMS (Learning Management System) to be automatically reported into your FH Training Module. There will no longer be a need to download reports from one platform and upload them into FH, nor to manually enter the details for any training your personnel complete online.

STREAMLINED, COST-EFFECTIVE TRAINING MANAGEMENT

FIREHOUSE Software is dedicated to helping agencies manage business, day-to-day operations & planning, field operations & decision support, communications, and technical challenges. Experience FIREHOUSE Software, and you'll experience software, support, and services unmatched in the industry.

All FIREHOUSE Software modules are seamlessly integrated for one complete solution, and the flexible, modular design means it can be used at fire departments and EMS agencies, regardless of size. By selecting the modules and scalability level that best meet your needs and budget, FIREHOUSE Software can be licensed and deployed in one of three ways:

- **FH Standard:** for stand-alone workstations and local area networks.

- **FH Enterprise:** for wide area networks and departments requiring remote access to a central database.

- **FH Web:** for a central database and easy access from anywhere using a Web browser.

Each system includes advanced features for departments to tailor FIREHOUSE Software to their needs.
